

Regenerative therapy and how it affects equine veterinary medicine today.

June 4th, 2020 7PM EST

60 Minutes

Panel Webinar

1 CE Credit

RACE Approved

Course Description:

As Veterinarians, you know the basic science behind regenerative therapy and what options are out there. Maybe you have used certain therapies over others, but didn't know when to use a particular therapy. This CE will cover the science and knowledge we currently have on regenerative therapies. Specifically, it will cover the hows, whys and uses of amnion based therapies. This panel discussion will provide various view points on why leading clinicians use some of the widely available regenerative therapies and present clinical case studies using amnion based therapies.

Panel:

Dr. Scott McClure, DVM, DACVS, DACVSMR- Moderator
Dr. David Dutton, DVM, DACVS- Panelist
Dr. Beau Whittaker, DVM, CERP- Panelist
Dr. Mark Revenaugh, DVM, DACVS- Panelist

Course Overview:

Welcome Remarks by Dr. McClure
Presentation: Regenerative Therapy Overview (15min)
Panel Discussion (25 min)
Participant Questions (20 min)
